SEPTEMBER 2013

**September is Ovarian Cancer Awareness Month; therefore I am changing all of the pages of the September Newsletter Teal for Ovarian Cancer Month..... The letter below is from one of our own Jessica Cornwell, ASA III with District #2 Enforcement, who was diagnosed with Ovarian Cancer in April of this Year!**

Almost everyone can tell you that October is Breast Cancer Awareness Month and that the color associated with breast cancer is pink but most people don't realize that September is Ovarian Cancer Awareness Month and the color associated with it is TEAL. Ovarian Cancer is not discussed as much as breast cancer which is unfortunate because it is the 5<sup>th</sup> leading cause of cancer death in women.

20,000 women will be diagnosed with ovarian cancer this year and approximately 15,000 will die. This is a staggering 70% of women who will lose the fight with ovarian cancer. The reason that ovarian cancer takes so many lives is because it isn't usually found until the later stages. There is no early detection for ovarian cancer and the symptoms are so "silent" that they are often mistaken for anything other than cancer. I know this because I had the unfortunate distinction to become one of those 20,000 women.

In April of this year my life was changed. What was thought to be a benign mass on my left ovary turned out to be Stage 1 endometrioid ovarian cancer, surprising even my oncologist. The original thought after surgery was that I was going to be late Stage 2 or early Stage 3 because the Dr feared the cancer had spread to my lymph nodes so I was elated and grateful when it had not. I was lucky though, so many other women are not.

So this September I want all women and men to know the facts and the symptoms, women to arm themselves, men to help the women you love:

Jessica Cornwell

ASA III

ABC Enforcement District 2

**The Facts**  Ovarian cancer is one of the five leading causes of cancer death in American women.

 Ovarian cancer occurs in approximately 1 in 72 women.

 Each year, over 20,000 women are diagnosed and about 15,000 women die.

 A woman's chance of survival is better if the cancer is found early.

 A Pap smear is **NOT** a test for ovarian cancer; it detects cervical cancer.

## - A Tribute To My Daughter - Jada Zenobia -

Through my child's eyes I see possibilities,  
Through my child's eyes I see beauty,  
Through my child's eyes I see innocence,  
Through my child's eyes I see a future,  
Through my child's eyes I see wonderment,  
Through my child's eyes I see hunger for life,  
I see love for you Lord, through her eyes,  
I learn with her about God and what wonderful eyes she has  
Through her eyes I see GOD!
